## Legend - Summary

**SYNOPSIS****# of Total Computers**

Total number of computers sampled

**# Incapable**

Number of computers incapable of power management (Windows NT)

**# Capable**

Number of computers capable of power management

**# Exempt**

Number of computers exempted from power management by EZ Save (marked with EZ\_Exempt)

**# in Pool**

Number of computers targeted for power management with EZ Save

**# Compliant**

Number of computers with Energy Star active and settings equal to or less than desired times

**# Capably Non-Compliant**

Number of computers targeted for power management with Energy Star deactivated or with settings greater than desired times

**ENERGY STAR ACTIVATION****# w/ Power Management Enabled**

Number of computers that have Energy Star enabled (although settings may not be at target levels)

**# Managed by EZ\_Save**

Number of computers that have run the EZ Activation program (although settings may no longer be at target levels)

**SHUTDOWN TIMES IN MINUTES****Target**

The desired shutdown time

**Average**

Average actual shutdown time

**Difference**

Minutes above or below desired shutdown time

**NON-COMPLIANCE IMPACT****Minor**

1 to 6 minutes over desired time - results in estimated loss of &lt;25% of potential savings

**Medium**

7 to 20 minutes over desired time - results in estimated loss of 25-50% of potential savings

**Major**

Energy Star disabled or more than 20 minutes over desired time - results in estimated loss of &gt;50% of potential savings

**COMPUTERS BY OPERATING SYSTEM****Total**

Number of computers using each operating system

**% of Total**

Percentage of total number of computers

**Legend - Details****STATUS**

Shows the status of a system regarding Energy Star capabilities and activation:

**Activated**

The system has been activated by the EZ\_Active program.

**Unverified**

The system has not been activated by the EZ\_Active program.

**Incapable**

The system is running Windows NT 4 or earlier and cannot be activated.

**Exempt**

The system has been exempted from activation by the EZ\_Exempt program.

**USER**

The user name under which the user is logged in.

**SYSTEM ID**

The name of the computer. This is the NETBIOS name as set in the control panel under System Properties, Network Identification.

**OS**

The operating system of the user's system. The operating systems that can be detected are: Windows 95, 98, ME, NT, 2000, and XP.

**IMPACT****Minor**

1 to 6 minutes over desired time - results in estimated loss of <25% of potential savings

**Medium**

7 to 20 minutes over desired time - results in estimated loss of 25-50% of potential savings

**Major**

More than 20 minutes over desired time - results in estimated loss of >50% of potential savings

**TIME**

The current Energy Star setting of the system, in minutes. This is the wait time before the screen goes blank when the computer is not in use.

**SAMPLE DATE**

The date the system was sampled. This is recorded at the time EZ\_Sample is run, usually when the user logs in.
